Technical Innovations (Product Development)

DEW (Developer Efficiency Workbench) an open source, AI based enterprise grade platform agnostic custom application development tool. For projects needing rapid open-source software development to save cost, Tech Army is able to utilize its proprietary, Patent pending product (DEW).

It automates code generation using drag and drop for front end, back-end, webservices etc. Data binding is performed within the tool. We combine business analysis, software development and project management to build collaborative solutions for our clients.
